SKILLS

Programming Languages: Java, TypeScript, SQL, JavaScript, Python

Technologies: Spring Boot, React, Docker, GitHub, Google Cloud Platform, MariaDB, Microsoft SQL Server, Linux

WORK EXPERIENCE

Software Engineer

Jun 2024 – Present

AD Solutions

Hastings, MI

- Built a payment reconciliation automation between Stripe, an ERP, and the company's billing portal using Java, webhooks, and Microsoft SQL Server stored procedures, eliminating up to 3 days per month of manual accounting.
- Built 25+ JWT-secured RESTful APIs atop Microsoft SQL Server and MariaDB using Java, Spring Boot, and Spring Security, with TypeScript and React frontends for role-locked wallet pages, invoicing, and an internal CMS.
- Established a CI/CD pipeline with GitHub Actions, Google Cloud Platform, and Docker that reduced developer-involved deployment times from an hour to seconds, saving upward of a day per month of developer time.
- Added 1,000+ unit, integration, and API tests using JUnit 5, Mockito, MockMvc, RestTemplate, and GreenMail, achieving 70% method and 88% class coverage, preventing regressions.

Research Assistant

Jan 2026 – May 2026

Ferris State University

Hastings, MI

- Built Ferrell, a custom LLM-powered VS Code extension with a TypeScript and React frontend and a Java and Spring Boot backend on Amazon Web Services, providing students with code reviews, study tools, and Socratic mentorship.
- Led the Agile workflow on GitHub for a Scrum team, creating user stories, organizing issues, assigning priorities, maintaining the backlog, and coordinating feature delivery across members and stakeholders.

Software Engineer

Oct 2025 – Apr 2026

Telic Corporation

Hastings, MI

- Built the foundations of a full-stack international eCommerce platform for personalized children's books using TypeScript, React, PayloadCMS, PostgreSQL, and Docker for the R&D department of a software consultancy firm.

Software Engineer Intern

Sep 2023 – Apr 2024

Kendall College of Art and Design

Grand Rapids, MI

- Built 30+ RESTful APIs with JWT auth for a live billing portal using Java, Spring Boot, Spring Security, MariaDB, Stripe, and a massive Microsoft SQL Server ERP for the frontend team.
- Built key customer-facing frontend components such as the login, payment processing, supplies, equipment, service billables, and autopay UI using React and TypeScript that 650+ businesses rely on.

PROJECTS

Vala JetBrains, Creator (github.com/vala-lang/vala-jetbrains)

May 2025 – Present

- Built an open-source IDE plugin using Java for JetBrains IDEs, allowing developers to write using one of the most popular programming languages on Linux: the Vala programming language. Downloaded over 16k times.

Portfolio (github.com/tbusk/portfolio)

Jan 2026 – Present

- Created an open-source multi-theme static portfolio website template configured via JSON using TypeScript, Preact, Tailwind CSS, GitHub Actions, and GitHub Pages, enabling developers to easily showcase their programming work.

EDUCATION

BSc, Digital Media Software Engineering, Ferris State University

May 2022 – May 2026

GPA: 4.00 / 4.00 (*Summa Cum Laude*)

Awards: 2026 College of Business Excellence Award, Dean's List
