SKILLS

Tech Stack: Java, JavaScript, TypeScript, React, MS SQL, SQL, AWS, GCP, Python, OpenCode, Claude Code, Agile

EXPERIENCE

AD Solutions

Software Engineer

Remote

June 2024 – Present

- Built a payment reconciliation automation between Stripe, an ERP, and the billing portal using Java, webhooks, and MS SQL stored procedures, eliminating up to 3 days per month of manual accounting data entry autonomously.
- Established a CI/CD pipeline with GitHub Actions, GCP, and Docker that reduced deployment times from an hour of manual activity to a single approval, for up to a dozen releases per month.
- Redesigning the invoices to include a pay-by-mail tear-off page, redesigned the main page, and extended ERP content, generating 2,700+ invoices for 650+ businesses while enabling online, mail, and split-document delivery options.
- Designed and implemented an internal CMS extension to the billing portal using React, Spring Boot, MariaDB, and MS SQL, enabling staff across departments to manage the portal without the development team's involvement.
- Added 1000+ tests using JUnit 5 and Mockito, increasing test coverage of the backend by 70%, preventing regression and enabling more confident deployments.

Ferris State University

Research Assistant

Remote

Jan 2026 – May 2026

- Built Ferrell, a custom LLM-powered VS Code extension with a React/TypeScript frontend and a Java/Spring Boot backend on AWS, providing students with code reviews, study tools, and socratic mentorship.
- Implemented CI/CD pipelines for testing, documentation, Docker image builds, code quality, and VSIX extension packaging using GitHub Actions, Docker, and AWS.

Telic Corporation

Software Engineer

Remote

Oct 2025 – Apr 2026

- Built the foundations of a full-stack international eCommerce platform for personalized children's books using TypeScript, React, Next.js, PayloadCMS, PostgreSQL, and Docker, with i18n support for English and Arabic.
- Researched and tested dozens of image generation and feature-personalization ML models across platforms like GitHub, Huggingface, Replicate, OpenRouter, and Google, proving feasibility of personalization for illustrated books.

Kendall College of Art and Design

Software Engineer Intern

Remote

Sept 2023 – May 2024

- Developed the backend for a live billing portal using Spring Boot, Spring Security, MariaDB, Stripe, and a massive MS SQL ERP (thousands of tables/columns/procedures).
- Created RESTful APIs for 10+ ERP domains (contracts, equipment, invoices, meter readings, service calls, taxes) and Stripe, abstracting a massive MS SQL ERP behind clean, well-documented endpoints for the frontend team.
- Managed the team's complete Agile workflow on GitHub, creating user stories, organizing issues, maintaining the backlog, conducting code reviews, and coordinating with team members and stakeholders on a 10+ person team.
- Built key customer-facing frontend components such as the login, payment processing, supplies, equipment, and servicing billables, and autopay UI using React and TypeScript that 650+ businesses rely on.

PROJECTS

Portfolio: Created a multi-theme static website using Preact, TypeScript, Tailwind CSS, and GitHub Pages.

AWS DeepRacer: Created a ML model that ranks 2nd in the US, sub top 10 in North America, and top 60 worldwide.

Item Classification: With a DoD contractor, I helped build a computer vision system to reduce disposition waste.

EDUCATION

Ferris State University

Bachelor of Science in Digital Media Software Engineering, GPA: 4.00

Big Rapids, MI

May 2022 – May 2026

Achievements: 2026 College of Business Excellence Award Winner, Dean's List
