

WORK EXPERIENCE

Software Engineer

AD Solutions

June 2024 – Present

Part-time contract · Remote

- Maintained and expanded the billing portal as the sole developer on-call for 650+ clients covering Stripe, invoices, onboarding, and e-automate ERP in Java, Spring Boot, TypeScript, MariaDB, Google Cloud Platform, and React
- Saved 100 accountant hours yearly (5 minutes each at 100 payments per month) by automating reconciliation in an unsupported e-automate workflow, validated with accountants on test payments, posting, and reversals
- Automated Stripe payment recording into e-automate ERP by reverse-engineering its legacy Microsoft SQL Server backend and writing stored procedures affecting 20+ tables, invoked from Java and Spring Boot
- Reclaimed 288 hours for a sales manager (3 hours per week since August 2024) by automating weekly Pipedrive CRM lead board status reports for 5 sales teams in Java and Spring Boot
- Increased test coverage to 77% method and 88% class for the billing portal backend by adding 1k+ JUnit tests
- Reduced monthly deploy effort from 4 hours to 1 minute (1 hour of manual SSH pull-test-build-deploy, 4 times a month) by establishing CI/CD with GitHub Actions and Docker with testing, builds, approvals, and deployment

Research Assistant

Ferris State University

Jan 2026 – May 2026

Part-time · Remote

- Built a Claude-powered VS Code extension in TypeScript and Node.js that gave software development students in-IDE AI help for a campus pilot, with evaluation and expansion interest from schools in Canada and Kuwait
- Delivered 3 assistant modes (study, assignment, code review) via a Java, Spring Boot, PostgreSQL, and Amazon Bedrock backend on Amazon Web Services that streams Markdown over REST APIs
- Deployed the campus pilot on Amazon Web Services by running Docker images from ECR on ECS Fargate
- Rendered Markdown with syntax-highlighted code by building a VS Code Webview in TypeScript and React

Software Engineer

Telic Corporation

Oct 2025 – Apr 2026

Part-time contract · Remote

- Built an MVP international eCommerce platform for personalized books for children (English and Arabic) in TypeScript, React, Next.js, Node.js, PostgreSQL, Payload CMS, and Docker and handed it off to the client's team

Software Engineer Intern

Kendall College of Art and Design

Sept 2023 – May 2024

Part-time · Remote

- Unified AD Solutions client billing into a self-serve portal by building a Java, Spring Boot, TypeScript, and React application integrated with Stripe and e-automate ERP on Microsoft SQL Server
- Consolidated multi-invoice ERP billing for AD Solutions into one monthly PDF per customer, delivering 2.7k+ invoices by implementing a scheduled Java, Spring Boot, and Gradle generator with Thymeleaf and IronPDF

SKILLS

Languages: Java, TypeScript, SQL

Backend: Spring Boot, Node.js, MariaDB, PostgreSQL, Microsoft SQL Server, JUnit, Mockito

Frontend and Tools: React, Next.js, Docker, Git, Stripe, Amazon Web Services, Google Cloud Platform

EDUCATION

Bachelor of Science, Digital Media Software Engineering, Ferris State University

May 2026

GPA: 4.00 / 4.00 (Summa Cum Laude)

Awards: 2026 College of Business Excellence Award

PROJECTS

Vala JetBrains

github.com/vala-lang/vala-jetbrains

- Reached 17k+ downloads and 14+ GitHub stars by publishing an open-source Java JetBrains IDE plugin for Vala
