## SKILLS

---

**Programming Languages & Databases:** Java, TypeScript, Microsoft SQL Server, MariaDB, Oracle Database

**Cloud Providers & Technologies:** Google Cloud Platform, Amazon Web Services, Spring Boot, React, Docker

## WORK EXPERIENCE

---

### Software Engineer

Jun 2024 – Present

AD Solutions

*Hastings, MI*

- Saved 150+ hours/yr by building a Java / Spring Boot Pipedrive integration that emails weekly reports to 5+ teams.
- Reduced accountant workload by 100+ hours/yr by automating payment reconciliation across the billing portal, Stripe, and e-automate ERP with Java, Spring Boot, webhooks, MariaDB, and Microsoft SQL Server.
- Increased coverage to 77% method / 88% class for the billing portal backend by adding 1k+ JUnit and Mockito tests.
- Delivered 3k+ billing portal emails (invoices, autopay, onboarding, one-time codes) via Java / FreeMarker integration.
- Eliminated 40+ hours/yr of manual work for recruiters by building a Java / Quarkus automation that routes JazzHR candidates into workflows for 50+ jobs and syncs Predictive Index behavioral assessments to JazzHR via webhooks.
- Collected 1k+ payments by adding autopay to the billing portal in Java / Stripe and TypeScript / React.
- Cut developer deployment time from 4 hours/mo to 1 minute/mo by establishing CI/CD with GitHub Actions and Docker for a hybrid on-prem stack using Google Cloud Platform (logging, secrets, storage, sheets, monitoring).
- Replaced Zapier/CEO Juice meter pipeline for 12+ printers with a Java / Spring Boot flow that ingests Parseur webhooks, validates, and inserts meter reads into e-automate ERP via Microsoft SQL Server stored procedures.

### Research Assistant

Jan 2026 – May 2026

Ferris State University

*Hastings, MI*

- Provided software development students AI assistance inside VS Code by building a Claude-powered IDE extension for a campus pilot, with adoption interest from schools in Canada and Kuwait.
- Delivered three assistant modes (study, assignment, code review) in VS Code by creating a Java, Spring Boot, and Spring AI backend on Amazon Web Services using Claude Sonnet that streams Markdown over RESTful APIs.
- Expanded model context beyond Amazon Bedrock's file-type and count limits by designing a Markdown prompt pipeline that embeds up to 60 code files across 400+ types plus 4 PDFs/images.
- Rendered backend Markdown with syntax-highlighted code in the IDE by building a VS Code Webview in TypeScript and React with the VS Code API, Tailwind CSS, react-markdown, and Shiki.

### Software Engineer Intern

Sep 2023 – May 2024

Kendall College of Art and Design

*Grand Rapids, MI*

- Unified billing for 650+ business clients of AD Solutions via a Java / Spring Boot and TypeScript / React portal with Stripe and e-automate ERP Microsoft SQL Server (1k+ tables), covering login, equipment/usage, and payments.
- Consolidated multi-invoice ERP billing for AD Solutions into one monthly PDF per customer, delivering 2.7k+ invoices by implementing a scheduled Java / Spring Boot generator with Thymeleaf and IronPDF.

## PROJECTS

---

**Vala JetBrains**, Creator/Maintainer ([github.com/vala-lang/vala-jetbrains](https://github.com/vala-lang/vala-jetbrains))

May 2025 – Present

- Reached 16k+ downloads / 14+ GitHub stars by publishing an open-source Java JetBrains IDE plugin for Vala.

**Problem Tracker** ([github.com/tbusk/problem-tracker](https://github.com/tbusk/problem-tracker))

Jul 2026 – Present

- Enabled structured tracking of solved competitive programming problems and activity-based reports by building an open-source microservices app with Java, Spring Boot, Spring Cloud, and Oracle Database.

## EDUCATION

---

**BS, Digital Media Software Engineering**, Ferris State University

May 2022 – May 2026

GPA: 4.00 / 4.00 (*Summa Cum Laude*)

**Awards:** 2026 College of Business Excellence Award, Dean's List
