SKILLS

Tech Stack: Java, TypeScript, SQL, Spring Boot, React, Docker, Python, GitHub, Tailwind CSS, AWS, GCP, Linux

EXPERIENCE

AD Solutions

Software Engineer

Remote

June 2024 – Present

- Created many automations for a variety of departments, including an automation that saves dozens of hours per month of manual accounting activity between a popular ERP, Stripe, and the company's billing portal.
- Designed and implemented an internal-facing CMS extension for the company's billing portal for staff of varying roles.
- Built a batch-processing system for onboarding hundreds to thousands of customers to the platform, tracking onboarding status, sending notifications, and more, speeding up and simplifying the onboarding considerably.
- Initially deployed and set up CI/CD pipeline for the company's billing portal with a hybrid-deployment strategy using GCP, GitHub Actions, Docker, bash, and an on-premises Linux VM.
- Improved the company's billing portal's test coverage considerably, adding thousands of tests to prevent regression.

Ferris State University

Research Assistant

Remote

Jan 2026 – May 2026

- Created a custom LLM-powered VS Code extension for software development students at a few universities to aid them in their studies using Spring Boot for the backend and a TypeScript React app for the frontend via a webview.

Telic Corporation

Software Engineer

Remote

Oct 2025 – Apr 2026

- Built a full-stack web application for a small consultancy company in Kuwait with the founder to sell personalized children's books with Payload CMS, React, TypeScript, Docker, various ML Models, and Tailwind CSS.

Kendall College of Art and Design

Software Engineer Intern

Remote

Sept 2023 – May 2024

- Built the backend for a company's billing portal using Spring Boot, SQL Server, MariaDB, Stripe, and a massive undocumented ERP system containing thousands of tables, tens of thousands of columns, and more.
- Developed key frontend components such as login, payment, and autopay UIs for the company's billing portal using React, TypeScript, Stripe, and more.
- Managed the project for the team on GitHub, including organizing issues, adding items to the backlog, doing code reviews, updating statuses, assigning issues, and more.

PROJECTS

Portfolio: Created a multi-theme static website using Preact, TypeScript, Tailwind CSS, and GitHub Pages.

AWS DeepRacer: Created a model that ranks second in the US, top 10 in North America, and top 60 worldwide.

Remote Development Environment: Set up, used IDEs, and developed projects on the cloud with Hetzner VMs.

Item Classification: With a military contractor, in a small team, we built a computer vision system to reduce waste.

OPEN SOURCE

Vala JetBrains IDE Plugin

github.com/vala-lang/vala-jetbrains

- Built and published a new plugin made with Java, with over 15k downloads, enabling development with Vala.
- Implemented a variety of features using a LSP including codelens, inline-docs, syntax checks, and more via LSP4IJ.
- Added advanced syntax highlighting, vala-lint integration, new project wizard, formatter, and basic syntax checks.

EDUCATION

Ferris State University

Bachelor of Science in Digital Media Software Engineering, GPA: 4.00

Big Rapids, MI

May 2022 – May 2026

Achievements: 2026 College of Business Excellence Award Winner, Dean's List
